Leandro Milia

Software Developer

Software Developer with +1 year of experience working with good practices and algorithms throughout the software development process. Currently I have been working for more than 6 months in my current position at Key data Company, implementing HTML, CSS, Javascript, AngularJS, PHP, Laravel, Bitbucket, Git, Jira, as a technology stack, providing business solutions to medical entities in Colombia.
As a self-taught student, learning is not an obstacle in some new challenge. My desire is to be able to contribute to the design of the company's solutions and to be able to grow in it.

Work experience
